

THE FUTURE

OF MINING

UNCENSORED

Wednesday 14 November 2012

UDIA (QLD) IS EXCITED TO PRESENT A COMPLETELY UNIQUE CONFERENCE CONCEPT IN NOVEMBER.

The Future of Mining - Uncensored will offer an unprecedented insight into the latest strategies from Queensland's leading mining companies, particularly as they relate to accommodating and retaining workers. A number of resource leaders have expressed an explicit goal to **'get in front of developers'** who can deliver better solutions for their

current and emerging needs. As well as outlining the big picture – getting behind the boom/crash headlines – this program will provide a frank discussion of key current and future projects, the challenges that must be faced, cutting edge design and an opportunity to **meet with mining.**
